

# Socket Modem Series

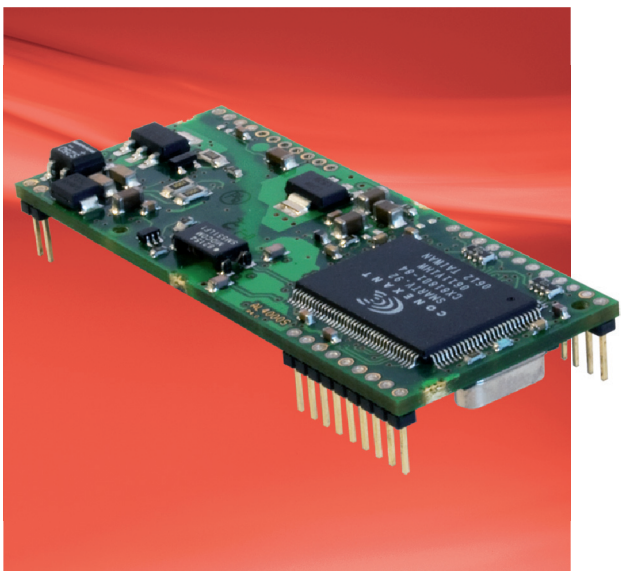

## **XM7000S / AL7024S - GSM Modules:**

GSM modules, supporting quadband, GPRS class 10 and EDGE. New version with HSPA available. TCP/IP stack, SSL protocol and email supported.

## **AL3094S / AL4094S - Analog 56K Modules:**

Analog V.92, 56K modem modules with data/fax/voice features and robust data transmission all over the world. Solid modem quality in a small form factor.

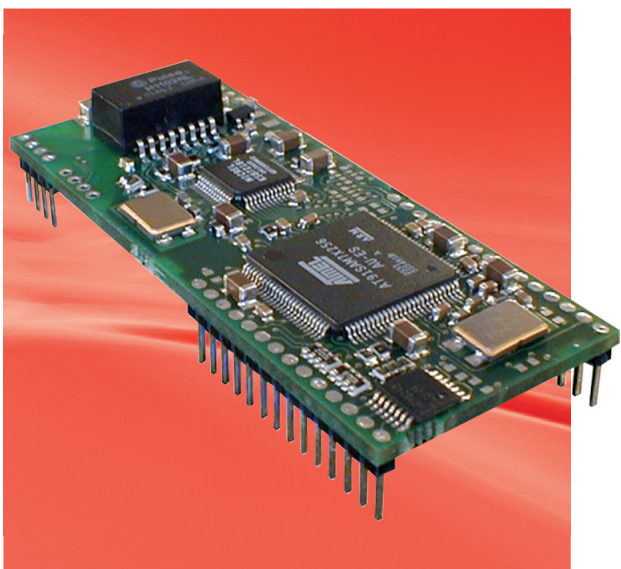

## **AL6000S - LAN / Ethernet Module:**

The AL6000S is an RS232 to Ethernet bridge, working as a COM server. This allows easy integration of serial devices into 10/100Base-T networks.

## **AL5068S - ISDN Module:**

The AL5068S is an ISDN terminal module designed for the European market. It supports all the common B-channel protocols including HDLC and PPP.

## **XM9000S - PLC Module:**

This module supports power-line data transmission using the common Cenelec A/B ARIB and FCC bands. Integrated DLL (data link layer) and Homeplug CC support.
